ArCH dataset Results submission

Authors:

Institution:

Approach (Machine learning or Deep learnig):

Name (of the classifier or neural network):

Short description:

Title of the reference/publication:

Website with the reference published:

Website with the code published:

Scenes used for training (please write "all" if you have used the whole training set provided, otherwise indicate the number of the scenes used):

Features used as input:

GPU/Hardware:

Linked projects (if your research has been funded by specific projects):

Further comments or any useful additional information:

Date:

                                                              THANK YOU!
